Refining the ETSI NFV standard

We reproduce here in full an article published by Antonio José Elizondo Armengol at Blogthinkbig.com, a blog focused on innovation which is sponsored by Telefonica. The article explains the contents and implications of the first Network Functions Virtualization (NFV) interoperability Plugtests® event, organized by ETSI, the European Telecommunications Standards Institute, and currently hosted by 5TONIC Laboratory in Madrid, with the technical support of Telefonica and IMDEA Networks Institute.

About Us

IMDEA Networks Institute is a research organization on computer and communication networks whose multinational team is engaged in cutting-edge fundamental science and technology. As a growing, English-speaking institute located in Madrid, Spain, IMDEA Networks offers a unique opportunity for pioneering scientists to develop their ideas. IMDEA Networks has established itself internationally at the forefront in the development of future network principles and technologies. Our team of highly-reputed researchers is designing and creating today the networks of tomorrow.

Some keywords that define us: 5G, Big Data, blockchains and distributed ledgers, cloud computing, content-delivery networks, data analytics, energy-efficient networks, fog and edge computing, indoor positioning, Internet of Things (IoT), machine learning, millimeter-wave communication, mobile computing, network economics, network measurements, network security, networked systems, network protocols and algorithms, network virtualization (software defined networks – SDN and network function virtualization – NFV), privacy, social networks, underwater networks, vehicular networks, wireless networks and more...
